Architectural Agreement

Name: _____ Date: _____

Lot Number: _____ Division: _____

This agreement is to insure that the terms of the Architectural Guidelines, as published by the Desert Aire Owners Association, is understood by both parties and will be followed. This agreement further specifies the actions, which Desert Aire Owners Association may take, if any inspection shows the property or construction on that property to be out of compliance.

Section 5 Enforcement

The Architectural Committee will make recommendations to the Board of Directors on enforcement of these Architectural Regulations. In doing so, it will adhere to the following procedures:

5.01 Correction Notice

The Architectural Committee, upon finding a violation of these Architectural Regulations, will issue a correction notice, directed to the record owner of the lot upon which a violation exists. The correction notice will contain:

- a) The street address and a legal description sufficient for identification of the premises upon which the structure or violation exists;
- b) A brief and concise description of the conditions found to be in violation of these Regulations;
- c) A statement of the action required to remedy the violation and the time within which such action must be completed; and
- d) A statement advising (1) that any person having any record title or legal interest in the property or structure may request a hearing on the correction notice before the Board of Directors, provided that the request is made in writing and filed with the board within 30 days from the date of the notice, and (2) that failure to request a hearing will constitute a waiver of all right to a hearing and determination of the matter.

5.02 Correction Action

If the lot owner fails to take the required corrective action in a timely manner, The Board of Directors may take appropriate enforcement action including monetary fines.

By signing this agreement, the property owner acknowledges receipt of a copy of the Architectural Regulations and states that they have read and understand the conditions implicit in these Regulations; and gives members of the Architecture Committee permission to physically inspect the said property.

Property Owners and Contractors Responsibilities

Whenever any property is to be developed, modified or for any reason the rights of ways are going to be disturbed by removal of any material, you are required by law to contact Under Ground Utility Locates and any other utility prior to any excavation. Failure to do so can cost you fines and repair bills for all the damages incurred due to your failure to do so and in some cases can result in lawsuits when your activities have caused harm to these vital services when they are interrupted.

The right of way consists of the area of ground between your front property line and the roadway. This is the most common area where utilities are located. In some cases in Desert Aire some of the utilities may be also located at the rear of the property in the area referred to as the green belt or any easement rights of ways that are attached to your property. It is your responsibility to ensure that the contractor has secured these locates prior to commencement of any work of this nature.

To contact for Underground Utilities Location, (at no charge) call 1-800-424-5555. They will need specific information on the property. This includes Township, Range, Section and specific location as well as the type of work to be done. When they get this, they will give you a confirmation number. Once you have all this you will have to wait on work until locates are done which is usually within 72 hours.

It shall be property owner/contractors responsibility to dispose of articles no longer useful to development of the building site. These articles include, but are not limited to old tires, wheels, axles and tongues used in transporting of manufactured homes or other amenities of development. Concrete blankets used as prevention against freezing of concrete, cardboard cartons, plastic wrap used for appliances, cabinets, Etc. All such articles must be disposed of as opposed to being left laying around at the mercy of the wind and becoming an eyesore to surrounding areas.

Will any excavation be occurring on the right of way at your location? _____

If yes, please give specific details and drawings on a separate sheet.

It is the Property Owners responsibility to read and understand the Current Architectural Regulations of the Desert Aire Owners Association, and to monitor your contractors to make sure they are following those Regulations. You may find these Regulations at the website or request a copy from the Owners Association Office.

All of the Regulations will be monitored including the areas that address Dust and Weed Control. The Common Areas/Rights of Ways/Green Belts, which may adjoin your property, MUST NOT be disturbed by the contractor, employees, or equipment. If a variance is needed, it may be requested from the Architectural Committee.

I, (print name) _____ have read the above sections and understand that by failure to return this part of the packet may result in non-approval of my plans for lot development. Further it is my responsibility to contact the proper agencies to fulfill my obligations of the law of the State of Washington.
